

Lewiston Police Department Press Release

Press Release #: 12- 08
Case #:
Date: 02-21-2012

(9-1-1 Telephone System)

On 02/20/12 we began experiencing issues with our 9-1-1 telephone system. Although we continued to receive all 9-1-1 calls, we did not receive data, such as the address/location and phone number from any wireless 9-1-1 call.

As of 02/21/12, the 9-1-1 Telephone system issues have been resolved. It was determined that there was a software communications server error that was creating the issues we were experiencing.

All 9-1-1 functions are operational at this time.
