

WATER CONSERVATION TIPS

Kitchen And Laundry:

Keep drinking water in the refrigerator instead of letting the faucet run until the water is cool.

Wash fruits and vegetables in a basin. Use a vegetable brush.

Do not use water to defrost foods, thaw in the refrigerator overnight. If washing dishes by hand, use a dishpan for rinsing dishes.

Scrape, rather than rinse, dishes before loading into the dishwasher. Operate the dishwasher only when completely full.

Add food wastes to your compost pile instead of using the garbage disposal. Use the appropriate water level or load size selection on the washing machine.

Bathroom:

Never use your toilet as a wastebasket.

Do not let water run while shaving or brushing teeth.

Take short showers instead of tub baths. Turn off the water flow while soaping or shampooing.

If you use the tub, fill the tub only half full.

Never pour water down the drain when there may be another use for it – such as watering plants or a garden.

Outside:

Sweep driveways, sidewalks, and steps rather than hosing off.

Wash the car with water from a bucket, or consider using a commercial carwash that recycles water.

When using a hose, control the flow with an automatic shutoff nozzle. Avoid purchasing recreational toys that require a constant stream of water. If you have a swimming pool, consider a new water-saving pool filter.

Lower pool water level to reduce amount of water splash out.

Use a pool cover to reduce evaporation when pool is not in use.

Equipment:

Repair all leaks. A leaky toilet can waste 200 gallons per day. To detect a leak in the toilet, add food coloring to the tank water. If colored water appears in the bowl, the toilet is leaking.

Install ultra-low flow toilets, or place a plastic container filled with water or gravel in the tank of your conventional toilet. Be sure it does not interfere with operation of the toilet's flush mechanisms.

Install low-flow aerators and showerheads.

Consider purchasing a high efficiency washing machine that can save over 50% in water and energy use.
